10700 Series Laminate Desking

HON[®]

Smart now. Smarter later.

10700 Series

Fortunately, there are some attributes that never really go out of style, even in the fast-paced business world. Sophistication. Beauty. Practicality. And functionality that flows so effortlessly it's downright elegant. That's the kind of thinking we put into the 10700 Series. Well, that and the kind of craftsmanship and quality we've become famous for over the decades. Perhaps that's why the 10700 Series has become a favorite choice of American businesses.

Ever wonder what that rounded edge is called?

It's called a waterfall. In addition to enhancing the contour and overall graceful look of the 10700 Series, it also serves a practical purpose: The gentle, curved profile is easy on your arms and elbows.

So timeless, it's always contemporary.

That's precisely why the 10700 Series addresses the needs of your business all the way from the reception area to the front office. And the price point will even satisfy your colleagues in accounting.

The durability of high pressure laminate... the elegance of real wood.

The 10700 Series offers a unique combination of surface materials that is unmatched in its class. Worksurfaces and outer end panels are clad in multi-layer high-pressure laminate that resists water, abrasions and most solvents – a feature not found on most similarly priced products. The hardwood accents are produced using state-of-the-art finishing technology and provide a touch of elegance that qualifies this series for upper management workspaces. A great, dependable investment? Unquestionably.

Locking Drawers

Our storage comes standard with locks, so that your associates can have their own secure areas. Or, matching lock cores are available so that multiple units lock with one key. Locks on overhead storage doors are optional.

Short Modesty Panel

Options in modesty panels on credenzas and returns let you decide whether your workspace is more black-tie or office casual. 10"-high modesty panels give you access to wall outlets. Full-height panels give you a more formal look that keeps walls and floorboards hidden. Formal or casual, always in style.

Confidence doesn't need to shout.

Style. You have it. The 10700 Series lets you show it off tastefully. Quietly. Nothing here screams "Look at me!" It just says that you have an eye for fine lines and for value. In a carefully modulated voice, of course.

Modular Storage (above)

Customize your workspace to match your work. The pencil/media/file pedestal (105092) features a specially-proportioned organizer to keep CDs accessible and safe. The lateral file (10503) has two spacious drawers for maximum records management. And, if your world is full of rubber bands and paper clips, select the trusty box/box/file pedestal (10502). Our handy cabinet pedestal (10508) is great for binders and books. The collection is rounded out with a mobile printer/fax cart, CPU pedestal for tower computers, and a versatile four-drawer multi file.

What is modular furniture?

In architecture, people talk about “core and shell” design where the “shell” provides the structure, while the “core” can be customized to suit the client. Modular furniture brings that same approach to the individual workstation. The modular “shells” provide the outer structure for the desk or credenza. Within the shell, the storage “cores” can be specified to meet unique work styles. When the business grows or moves, workstations can be converted from left-hand to right-hand layouts in minutes. Result? The maximum return on your furniture investment.

Positioning modular storage (right)

Modular pedestals can be set in place and individually leveled to fit seamlessly under desk, credenza or return shells. To the casual observer, they look as though they were installed at the factory. But when it’s time to re-arrange the workspace you’ll be delighted with the speed and ease with which they can be relocated.

An extended family.

From the reception area to the maze of cubes, to the back office to the corner office, everything in the 10700 Series works with everything else in the 10700 Series. Just like family.
